It is my understanding that the County is the lead for the response and the WVDEP is providing support to them. And we are providing support to the WVDEP.

I will find a contact for media as soon as I can find parking

Debbie – my apologies – I should have included you – I didn't know if you had access to email this morning.

Need a fast response for HQ – thanks.

Is there a POC for media or citizen inquiries?

Thanks.

While the state has the lead for this response, EPA has been coordinating with the West Virginia DEP since Saturday evening in providing air monitoring support around the location of the fire in Parkersburg. EPA also is providing air quality standards to the state. Please contact WVDEP for additional information.
